

Table of Contents

Executive Summary

- E1 Steadily IMS is gaining ground
- E2 IMS is offering a variety of benefits and opportunities for early adopters
- E3 Challenges and Issues with IMS
- E4 Development of IMS Handsets
- E5 IMS Business Model
- E6 IMS' Impact on the Telecom Value Chain
- E7 Conclusions and Key Findings

1. Introduction

1.1 IMS Defined

Figure 1: IMS a Layered Architecture

1.1.1 IMS: Envisaged by 3GPP

1.1.2 IMS is Access Agnostic

1.2 Business Case for IMS

1.2.1 Short and Long Term Business Objectives

1.2.1.1 Convergence

1.2.1.2 Need for Differentiation

1.2.1.3 Success of the Internet

1.2.1.4 IP Telephony

1.2.1.5 Telecom Market evolution

Figure 2: Telecom Market Evolution

1.2.1.6 Why IMS is Critical for the Operators' Growth Strategy?

Figure 3: IMS Business Case

1.3 Aim of the Report

1.3.1 Holistic Framework for formulating IMS strategies

Figure 4: IMS Framework

1.4 Report Structure

1.5 Report Scope

1.6 Methodology

2. Understanding IMS

2.1 Next Generation Networks (NGN)

2.2 Mobile IP

2.2.1 All IP Networks

2.2.2 Transition from Circuit to Packet Switched Networks

Figure 5: Transition from Circuit to Packet Data

2.2.2.1 Stage One: 2G (Circuit based)

2.2.2.2 Stage Two: 2.5G (CS augmented with PS enablers)

2.2.2.3 Stage three: 3G and beyond (mostly PS-based networks, some CS)

Figure 6: Stages in Transition from Circuit Switched to Packet Switched Networks (2009)

Figure 7: Present and Future Networks

- 2.2.2.4 IMS: An All IP Networks/Next Generation Network
 - Figure 8: Traditional GSM Networks (Stovepipe Approach)
 - Figure 9: Horizontal Layered Architecture in IMS
- 2.3 IMS Architecture
 - 2.3.1 Core Elements of IMS network
 - Figure 10: IMS Architecture
 - 2.3.2 Enhanced Service Delivery with IMS
 - 2.3.3 Flexibility in IMS
 - 2.3.3.1 Gateway or the Transport & Endpoint Layer
 - 2.3.3.2 The Session Control Layer
 - 2.3.3.3 The Application Server Layer
- 2.4 Media Gateways
 - 2.4.1 Home Subscriber Services
 - 2.4.2 Summary of IMS Network Architecture
 - Table 1: IMS Complete Service Delivery Proposition
- 2.5 IMS Handset Architecture
 - Figure 11: High Level IMS Client Architecture
- 2.6 Key Features of IMS Technology
 - Table 2: Features Offered by IMS (R5)
- 2.7 Protocols Used in IMS
 - 2.7.1 Session Initiated Protocol (SIP)
 - Figure 12: SIP Components
 - 2.7.1.1 SIP's Routing Decisions
 - 2.7.1.2 Problems posed by SIP
 - 2.7.1.2.1 QoS
 - 2.7.1.2.2 Fraud/Privacy
 - 2.7.2 Session Description Protocol
 - 2.7.3 RTP (Real Time Protocol)
 - 2.7.4 Diameter
 - 2.7.5 H.248 Megaco
- 2.8 Fixed to Mobile Convergence (FMC)
 - 2.8.1 Convergence Trends in the Telecoms Market
 - Chart 1: Broadband Customer Growth (2009-2015)
 - 2.8.1.1 Fixed Network Operators and their Interest in IMS
 - 2.8.2 What is FMC?
 - 2.8.2.1 What FMC will offer?
 - 2.8.2.2 Market Demands for FMC
 - Table 3: Key FMC Deployments So Far (2009)
 - 2.8.2.3 Fixed Line Operators Interested in Wireless Solutions
 - 2.8.2.4 IMS and Fixed-Network VoIP Service Providers
 - 2.8.2.5 IMS and Cable Service Providers
- 2.9 Making IMS Foolproof
 - 2.9.1 Interoperability
 - 2.9.2 Interoperability of SIP and SS7 Signalling
 - 2.9.3 Compatibility
 - 2.9.4 QoS Issues

- 2.9.5 Service Assurance and Risk Management
- 2.9.6 Security
- 2.9.7 IPv4 to IPv6 Conversion
- 2.10 Fundamental Technology Threats to IMS
- 2.10.1 Business Issues
- 2.10.2 Interoperability with Legacy Networks
- 2.10.3 IMS Client Issues
 - 2.10.3.1 Are there any alternatives to IMS Handsets?
- 2.10.4 Web 2.0 and IMS
- 2.10.5 IMS and SDP
 - 2.10.5.1 Interplay Between SDP, IMS and Web 2.0
- 2.10.6 IMS must support non-SIP Applications
- 2.11 Standards and Regulations
 - 2.11.1 3GPP: Establishing IMS Requirements and Architecture
 - 2.11.1.1 How 3GPP Works
 - 2.11.1.2 Release 99
 - 2.11.1.3 Release 4
 - 2.11.2.3 Release 5
 - 2.11.1.4 Release 6
 - 2.11.1.5 Release 7
 - 2.11.1.5 Release 8
 - 2.11.1.6 Availability of IMS Equipment based on 3GPP Releases
 - 2.11.2 3GPP2: Working Closely with 3GPP on IMS Architecture
 - 2.11.2.1 Collaboration between 3GPP and 3GPP2
 - 2.11.3 TISPAN
 - 2.11.4 The Internet Engineering Task Force (IETF)
 - 2.11.5 Consortia, Coalitions and Associations
 - 2.11.5.1 SIP Forum
 - 2.11.5.2 SIP Centre
 - 2.11.5.3 Fixed-to-Mobile Convergence Alliance (FMCA)
 - 2.11.5.4 NGN IMS Forum
 - 2.11.5.5 OMA
 - 2.11.5.6 GSMA's RCS Initiative
 - Table 4: RCS Members
 - 2.11.6 Cable Labs
 - 2.11.6.1 PacketCable 1.0 and 1.5
 - 2.11.6.2 PacketCable 2.0
- 2.12 Regulatory Issues
 - 2.12.1 Regulation and Interconnection of Data Networks
 - 2.12.2 Other Regulatory Issues

3. Identifying the IMS strategy, Desired Outcomes, Benefits and Challenges

3.1 IMS Strategy

Figure 13: Operator Strategies to Deploy IMS

3.1.1 Deciding the Right Strategy

3.1.1.1 Network Infrastructure

3.1.1.1.1 Legacy Systems

3.1.1.1.2 2G Networks

Figure 14: Migration Options for Network Operators

3.1.1.1.3 Need for Training

3.1.1.1.4 Customer Care

3.1.1.1.5 Fixed Network Operators

3.1.1.1.6 Cable Operators

3.1.1.2 Standards based Approach

3.1.1.3 Growth

3.1.1.4 Differentiation

3.1.1.5 Customer Requirements

3.1.1.6 Time to Market

3.1.1.7 Other Questions

Table 5: Critical Questions that must be considered by Operators

3.1.2 Responding to Internal and External Environmental Pressures

Table 6: Benchmarking Guidelines for IMS Proposition

Table 7: Forming a IMS Strategy

3.2 Benefits of IMS

3.2.1 Capability to Launch New Services Faster

3.2.2 Range of Applications can be launched

3.2.3 Ability to Offer Converged Services to Customers

3.2.4 Powerful User Devices

3.2.5 Open Service Creation

3.2.6 Enhanced End User Proposition

3.2.6.1 Integrated Rich Media

3.2.6.2 Single Public Identity

3.2.6.3 Personalised Communications

3.2.6.4 Roaming

3.2.6.5 Cost Effective Solutions

3.2.6.6 Enhancement over Internet offering

3.2.7 Summary of Key Benefits

3.3 Desired Outcomes

3.3.1 Identify which Customer Segments to Target

3.3.1.2 How Operators can Target the Business Segment

3.3.1.3 Needs of Business Customers

3.3.1.4 ARPU Growth from Small and Medium Sized Companies

3.3.2 Mass Market for IMS

Table 8: Practical Benefits of IMS to Customers

3.4 Challenges Facing Mobile Operators

3.4.1 Evolving to an all IP Network

3.4.2 Finding the Right Business Model

3.4.3 Status of standards

3.4.4 Equipment availability

3.4.5 Service maturity

3.4.6 Increasing Operator Competition

- 3.4.7 Availability of Handsets
- 3.4.8 Intervening Networks
- 3.5 Challenges to Fixed Line Operators
- 3.6 How Vendors are selling IMS
- 3.7 Summary

4. Approach to IMS Deployment

- 4.1 End-to-end Deployment
- 4.2 Phased out Deployment
 - 4.2.1 What Constitutes Part Deployments?
 - 4.2.2 Deploying a part of IMS Solution
 - 4.2.3 Problems with Part Deployment
- 4.3 Single Vendor Approach
- 4.4 Multiple Vendor Approach
- 4.5 Hosted IMS Solutions
 - 4.5.1 Service Delivery Platform Approach
- 4.6 Deploying other Core Technology Components as a step towards IMS
 - 4.6.1 IP-based Softswitch
 - 4.6.1.1 Benefits of Softswitch Technology
 - 4.6.2 Using GAN as a stepping stone to FMC
- 4.7 Steps to IMS Deployment
 - 4.7.1 Migration Strategies
- 4.8 How to Approach Convergence in Networks
 - 4.8.1 IMS with LTE
 - 4.8.1.1 What is LTE?
 - 4.8.2 Unlicensed Mobile Access (UMA) or Generic Access Networks (GAN)
 - 4.8.3 Packet Core FMC Solution
- 4.9 The Right Choice

5. Players in the IMS Market

- 5.1 Industry Structure
 - Figure 15: IMS Value Chain
- 5.2 Infrastructure Vendors
 - Figure 16: Components in IMS Architecture
 - Table 9: List of Tier 1 IMS Equipment Vendors
 - 5.2.1 Ericsson
 - 5.2.1.1 Ericsson's IMS Studio
 - 5.2.1.2 Ericsson's take on IMS Devices
 - 5.2.1.3 Ericsson's Key Contracts
 - Table 10: Ericsson's Key IMS Contracts
 - 5.2.1.4 Ericsson's Expert Centres
 - 5.2.2 Nokia Siemens Networks (NSN)
 - 5.2.2.1 NSN's IMS contracts
 - Table 11: NSN's Commercial Reference for IMS
 - 5.2.3 Huawei
 - 5.2.4 Alcatel Lucent

5.2.5.2 Alcatel Lucent's IMS Customers

Table 12: Alcatel Lucent's IMS Deployments So Far (2009)

Table 13: Alcatel Lucent's Key IMS Contracts

5.2.5.3 Key Partners of Alcatel Lucent in IMS

5.2.5 Motorola

5.2.6 Nortel

Table 14: Nortel's Commercial Reference for IMS

5.2.7 ZTE

5.2.8 Tekelec

5.2.9 Radisys Convedia

5.2.10 Oracle

5.2.11 Aricent

5.2.11.1 Aricent's Handset Client

5.2.12 Nable Communications

5.2.12.1 IMS Clients

5.2.13 Blue Slice Communications

5.2.14 Celtius

5.2.15 Tata Systems

5.2.15.1 Ericsson and Tata

5.2.16 Intel

5.2.17 HP and Tekelec

5.2.18 Cisco

Table 15 : Cisco's Key IMS Clients

5.2.19 BroadSoft

5.2.20 Acme Packet

5.2.21 Thomson

5.2.22 Audio Codes

5.2.23 Genband

Table 16: List of Gateway Vendors

5.2.25 NEC

5.2.26 Camient

5.2.27 Radvision

Table 17: Radvision's IMS Suite

5.2.27.1 Radvision's Client

5.2.28 Starent Networks

5.2.29 Newport Network

5.2.30 Iperia

5.2.31 RedKnee

Table 18: Application Server Vendors

5.2.32 BEA Systems

5.2.33 ECI Telecom

5.2.34 Juniper Networks

5.2.35 Radcom

5.2.36 Sonus Networks

5.2.37 Converse

5.2.38 Vendor Ranking

Table 19: Vendor Ranking in IMS Equipment Deployments and Shipments

5.2.39 Strategies for Vendors in the IMS market

5.2.40 How Vendors are selling IMS

5.3 System Integrators

Table 20: List of System Integrators

5.3.1 IBM

5.4 IMS Handset Client Vendors

Table 21: List of IMS Handset Client Vendors

5.4.1 Comneon

5.4.1.1 Comneon's IMS Clients

5.4.1.2 Comneon's Key customers

5.4.2 NMS communications

5.4.3 Nokia

5.4.4 Motorola Mobile Devices

5.4.5 Samsung

5.4.6 Ecrio

5.4.7 Quanta Computer

5.4.8 Hello Soft

5.4.9 Handset Manufacturers

5.5 IMS Application Developers

5.6 IMS Gaming Vendors

5.6.1 Connect2Media (C2M)

5.6.2 Nexos

5.6.3 Exit Games

5.7 Other Applications Developers

5.8 Summary

Table 22: Vendors offering IMS service solution

6. IMS Applications, Deployments and Development

6.1 Applications offered by IMS

Table 23: Applications Enabled by IMS

6.1.1 Push to Talk over Cellular (PoC)/(PTT)

Table 24: List of Operators offering IMS ready PTT

Table 25: List of Vendors offering IMS Compliant PTT Solutions

6.1.1.1 Variants of PoC

6.1.1.2 PoC Will Drive IMS rollouts

Chart 2: PoC Subscriber Growth (2009-2015)

6.1.2 Video Telephony

Chart 3: Mobile Video Telephony Revenues (2009-2015)

6.1.3 Multimedia Streaming

6.1.4 Mobile Instant Messaging (MIM)

Chart 4: MIM Revenue Growth (2009-2015)

6.1.5 Presence

6.1.5.1 IMS Presence Services for Interactive Games

6.1.6 IPTV

6.1.6.1 Stand Alone Solution

- 6.1.6.2 Deploying IMS core and IPTV as a value added service on top
- 6.1.6.3 Developments in IPTV arena
- 6.1.6.4 Market for IPTV
 - Chart 5: IPTV Subscriber Growth (2009-2015)

7. Forecasts and IMS Profitability

7.1 Facts and Figures

7.1.1 Global Market Evolution to IMS

Chart 11: Share of Technologies Worldwide (2009)

7.1.1.1 3G Subscriber Growth

Chart 12: Global W-CDMA and GSM Subscriber Growth (2009-2014)

Chart 13: Global 3G Revenues (2009-2015)

Chart 14: Data revenues as a percentage of total revenues (2009-2015)

Table 29: HSDPA and WCDMA Statistics (2009)

7.1.1.2 From HSPA to HSPA+ and LTE

7.1.1.2.1 LTE Market and Opportunities

7.1.1.2.2 Why LTE?

Chart 15: LTE Subscriber Growth (2009-2015)

Chart 16: LTE Operator Revenues (2009-2015)

Chart 17: Revenues from Base Stations for LTE Networks (2009-2015)

7.1.1.2.3 LTE and IMS together in a Converged Network

7.2 IMS Deployment Time Frames

Chart 18: IMS Demand by Region (2009)

Chart 19: IMS Deployments

7.2.1 Developed Markets

7.2.1.1 US

7.2.1.2 Europe

7.2.2 Asia and other Emerging Markets

Chart 20: Softswitch Deployments in Asia

7.2.2.1 China

7.2.2.2 India

7.2.3 Deployments by Operator Type

Chart 21: IMS Deployments by Operator Types by (2015)

Chart 22: IMS Networks as a Percentage of Total Networks (2015)

7.3 Data ARPU from IMS

Chart 23: Percentage Data Revenues Generated by Different Data Applications (2015)

Chart 24: Global Data ARPU (2008-2015)

7.4 Impact on SMS Revenues via the Introduction of MIM using IMS Platforms

7.5 IMS Infrastructure Requirements

Table 30: IMS Equipments that must be deployed on incremental basis

Chart 25: IMS Control Layer Equipment Sales (2007-2014)

7.6 IMS Vendor Market share

Chart 26: Vendor Market Share (2009-2010)

Chart 27: Vendor Market Share (2015)

7.7 IMS Growth Prospects

Chart 28: IMS Revenues (2009-2015)

7.8 IMS Handsets

Table 31 : IMS Handset Enablers

- Chart 29: 3G Growth Vs IMS Growth
- 7.8.1 SIP Enabled Handsets
 - Figure 17: Device Convergence
 - Chart 30: IMS Subscriber Growth (2007-2015)
 - Chart:31: IMS Handset Shipments (2008-2015)
 - Chart 32: SIP handset Shipments
- 7.9 Develop New Business Propositions
 - 7.9.1 New Business Model
 - 7.9.2 Long-term Benefits or Short-term Gains?
 - 7.9.3 OpEx Savings
 - 7.9.4 Cost of Deployment
- 7.10 IMS Applications
 - 7.10.1 Time to Market with new Applications
- 7.11 Hosted IMS Solutions
- 7.12 Profitable Customer Segment
- 7.13 FMC Market
- 7.14 IMS ROI Scenarios
 - Figure 18: ROI from IMS Investments
 - Table 32: IMS SWOT Analysis

8. Recommendations and Conclusion

- 8.1 Threats to IMS
 - 8.1.1 SDP
- 8.2 Recommendations
 - 8.2.1 For Operators
 - 8.2.1.1 Focus on High Revenue per Megabyte
 - 8.2.1.2 Investment Strategies
 - 8.2.1.3 Smooth Transition to IMS
 - 8.2.2 For Vendors
 - 8.2.3 For Device Manufacturers
 - 8.2.3.1 Time to Market
 - 8.2.3.2 Handset Development Strategy
 - 8.2.4 Applications for the Future
 - 8.2.5 IMS: Becoming a Reality
- 8.6 Conclusion
